

Poinsettia Care During the Holidays

Place your plant in indirect sunlight for at least six hours per day. If direct sun can't be avoided, diffuse the light with a shade or sheer curtain.

Provide room temperatures between 68-70 degrees F. Generally speaking, if you are comfortable, so are your Poinsettias. Do not place plants near cold drafts or excessive heat. Avoid placing plants near appliances, fireplaces, or ventilating ducts.

Water your plants when the soil feels dry to the touch. Avoid overwatering or allowing plants to sit in standing water. Always remove the plants from decorative containers before watering and allow the water to drain completely.

It is not necessary to fertilize your plants when they are in bloom.

Our Poinsettia History
